# The Becker Mercedes-Benz JetVan™

## Designed for Those Who Appreciate the Very Best

Floor Plan C

Year after year, Becker Automotive Design conversions have been consistently named “Best of the Best” in private luxury transportation by *Robb Report* and other lifestyle and business publications.

Becker Automotive Design has earned an international reputation for building the most comfortable, thoroughly appointed and professionally finished conversions available. Which is why private, corporate and government clients worldwide—on five continents—contract Becker when only the best will do.

The Becker Mercedes-Benz JetVan provides the ultimate in personal and business luxury transportation. Beginning with the latest-generation Mercedes-Benz Sprinter, the JetVan—available in three body sizes—is offered in six interior configurations.

### About the Mercedes-Benz Sprinter

The latest-generation Sprinter is built in Germany by Mercedes-Benz, offering JetVan owners the finest, safest, and most reliable luxury transportation available today.

### Quiet and Smooth

True luxury transportation means a quiet, smooth ride that meets your highest expectations. Inside, aviation-level sound deadening and noise isolation is engineered into every JetVan. Advanced Mercedes-Benz approved suspension upgrades and chassis refinements ensure a comfortable ride regardless of road surface.

### BluTEC is the new Green

Breakthrough BluTEC technology makes the turbo-Diesel engine in the Sprinter one of the cleanest on the planet, combining extremely low emissions with low maintenance matched by power, torque and longevity that is the envy of the automotive industry.

### Safety

Engineered to the highest standards of occupant safety, the Mercedes-Benz Sprinter incorporates active and passive systems; Load Adaptive Electronic Stability Program, anti-lock braking, skid control, and roll over mitigation; in short, the most advanced safety technology ever offered in its class.

### The Ultimate Seating

Becker's proprietary orthopedic, electric lounge seating offers unmatched comfort and luxury. You and your passengers will enjoy a living room experience and arrive at your destination relaxed and refreshed.

### Ease of Entry and Exit

Guests of all ages step in and out of Becker's electrically controlled side entry door, comfortably and safely.

## The Only Luxury Conversion Approved By Mercedes-Benz

The Becker Mercedes-Benz JetVan is the *only* luxury conversion approved under the Mercedes-Benz Customer Assurance Program. Why? Because Becker conversions meet or exceed the same exacting quality and safety standards established by the Mercedes-Benz factory.

The JetVan is perfectly at home parked next to the world's most beautiful automobiles. Tasteful exterior enhancements include monochromatic paint treatment, front valance and color-matched entry side steps that complement the classic Mercedes-Benz style.

A walk-in electric sliding door welcomes guests, and luxurious seating accommodates up to nine adults in owner-driven configurations, with four to seven rear-seated passengers in limousine configurations. All three body sizes boast leg- and headroom unmatched by any sedan, limousine or SUV, while extra-height models provide full stand-up headroom for the

ultimate feeling of spaciousness.

Aviation technologies abound in the engineering, product selections and manufacturing of the JetVan. Finest materials and surfaces employed by master craftsmen include aviation-grade leather, Ultraleather walls and headliners, choice wood veneers and wool carpeting designed to client specifications.

Aviation-spec electric blinds and an optional bulkhead divider offer total privacy, while a heavy-duty climate control system furnishes HEPA filtered fresh air—quietly. Aircraft-spec LED lighting creates the ambience of a private jet. Available electronics systems—a Becker specialty—include a 40-inch LCD screen with additional personal monitors, surround sound, full computer and Internet capability, and all systems are controlled by easy-to-use touchscreens by Crestron®. Refrigerated beverage stations, and an optional vacuum pump-operated toilet—concealed for privacy—make even long trips a comfortable journey.
